

Smarter Roads, Stronger Fleets

One ELD at a Time

DriverBook offers an **FMCSA-compliant** ELD device & all-in-one fleet solutions that simplify **operations**, ensure **compliance** & **boost performance**.

FMCSA Regulations

The screenshot displays the DriverBook software interface. At the top, a navigation bar includes 'Fleet Compliance' (Comprehensive compliance monitoring and management), 'Driver Notifications', 'Real-Time GPS Tracking', 'Communication', 'Simplified IFTA Reporting', and 'Maintenance Alerts'. The main area shows a driver profile for Mathew James with fuel level data (85%, 85%, 85%, 15%, 32%, 85%), a circular clock showing 08:00 Break, 11:00 Driving, and 14:00 Shift, and a map of the United States and Mexico. Below this is a log table with columns: SR, Status, Start Time, Duration, Location, Vehicle ID, Odometer, Eng. hours, Shipping ID, Note, Trailer, and Action. The table lists three entries for a Volvo VNL 760 truck. At the bottom, a 'Vehicle Info' section shows a timeline from 12:00:00 AM to 6h 54m 30s, with a total distance of 600.456 mi.
